

„Christa“ - 12 V LED Strip with a Width of 3 mm

Christa is a universal LED circuit board whose width of only 3 mm makes it particularly suitable for applications with restricted space.

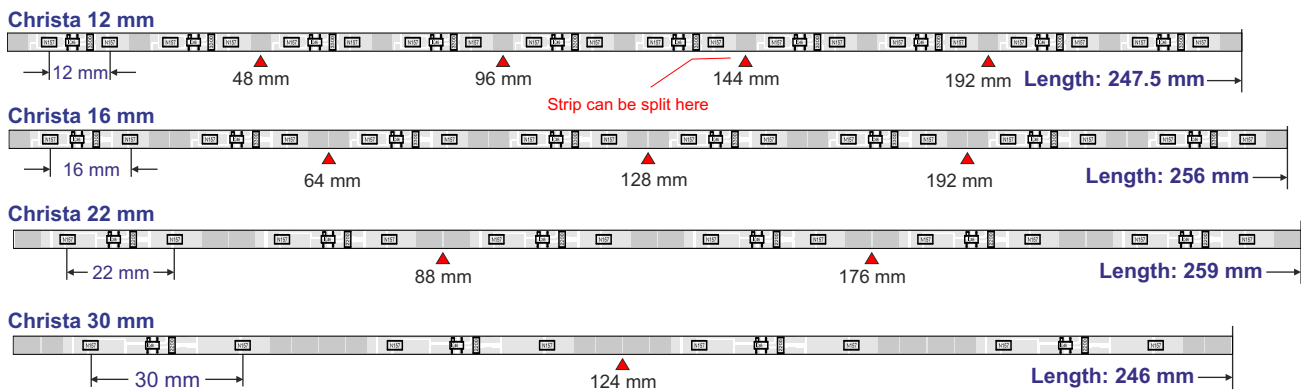

Christa is the favourite choice for illuminating engraved acrylic glass panes, as it allows the use of acrylic panes with a thickness of only 3 mm.

The circuit boards are available in lengths between 247.5 and 259 mm and can be split or extended as required. The maximum lengths are listed in the table below.

The shortest splittable length is 48 mm (4 LEDs). Equipped with white, blue and green LEDs this strip can be split in halves of 24 mm (2 LEDs).

Electrical connection is via soldering pads located on the small end.

Technical specifications

Type	Dimensions (mm)	LED spacing (mm)	No. of LEDs	Splittable every (mm)	Power (W/m) white/blue/green	Power (W/m) red/yellow/amber	Max. length p. power supply point (m)
Christa 12 mm	247.5 x 3	12	20	48 mm	12.3	9.7	1.2 m
Christa 16 mm	256 x 3	16	16	64 mm	9.3	7.8	1.6 m
Christa 22 mm	259 x 3	22	12	88 mm	6.6	5.8	2.2 m
Christa 30 mm	246 x 3	30	8	124 mm	3.9	4.1	3.2 m
