

# 0-10 V Control Voltage Generator – Description

**Type 1:  
with external potentiometer**

Article no. 5 1201 017

CE IP 65

Dimensions: 90 x 46 x 32 mm

**Type 2:  
with integrated slotted potentiometer**

Article no. 5 1201 117

This device is designed to supply the 0-10 V control voltage required by many dimmable converters.

The control voltage generator is fully embedded in a white plastic housing and provided with two 1 m connecting cables.

The control voltage is adjusted by means of a potentiometer available in two versions:

**Type 1:** Has an external potentiometer with a rotary knob connected to the device by a 1m cable.

**Type 2:** Has a small slotted potentiometer integrated in the housing, which can be operated with a screwdriver.

The following converters can be controlled using this device:

- C25/300D
- C25/990D
- C50/500D
- C50/990D
- C100/300D
- C100/990D
- C350/180D
- C350/300D
- C500/120D
- C500/200D
- C750/85D
- C750/140D

**Connection scheme for dimmable converters**

**Connection scheme for 12 V dimmers**
